

Roman Lucian

AI Automation & Business Systems Consultant

Normanhurst, NSW · Australian citizen · romanlucian@proton.me · romanlucian.dev

I help founders and small teams turn messy operations into clear, automated systems using AI, APIs, dashboards, workflow design, and practical delivery processes.

PROFILE

Results-driven consultant with 10+ years of independent experience designing business systems, workflow automations, dashboards, and delivery documentation. Hybrid profile combining business analysis, hands-on technical execution, product thinking, and operational governance.

SELECTED RESULTS

- **LeadGenBud:** improved client onboarding, trust flow, dashboard clarity, provider checks, and release evidence for a client-facing lead-generation product.
- **Automation systems:** built reusable reporting, routing, notification, and operational support workflows with Python, Google Apps Script, APIs, and n8n-style patterns.
- **Business analysis:** turned ambiguous workflows into As-Is / To-Be maps, specs, delivery notes, acceptance checks, and operator-ready handover material.

CORE CAPABILITIES

- | | |
|----------------------------|--|
| • Business systems audits | • Python, Google Apps Script, JavaScript |
| • Workflow automation | • REST APIs, webhooks, OAuth, JSON |
| • AI-assisted operations | • SQL, MySQL, SQLite |
| • Dashboards and reporting | • Laravel/PHP product flows |
| • PRDs, specs, runbooks | • Jira, GitHub Actions, review gates |

EXPERIENCE

Independent Systems & Automation Consultant

2014 — Present · NSW, Australia

- Designed end-to-end workflow automations across finance, operations, communications, reporting, and lead generation.
- Ran discovery, mapped process bottlenecks, wrote implementation specs, and delivered practical systems with documentation and adoption support.
- Integrated SaaS tools, databases, spreadsheets, and communication workflows through APIs, scripts, and reviewable delivery loops.

LeadGenBud — Product, Data & Operations

Recent platform work · Lead generation, dashboards, Laravel/PHP, SQL, Jira, CI/CD

- Improved onboarding, pricing clarity, CTA flow, dashboard readability, provider-readiness checks, and safer release evidence.

- Investigated blocked states through logs, routes, queues, schemas, failed jobs, provider status, and user impact before recommending next actions.

Founder & Operator — Tradeasy.me

2021 — Present

- Designed and shipped a trading-focused web product with automation for reporting, tracking, operational support, and API-connected workflows.
